

COMMUNITY SERVICES REPORT 2021

My Name is Meema Makairos Leyasek. I did community Sciences at patandi hospital on Feb 10-2021 until March 10-2021. In community Services. I did manything like take the weight and kilograms of sick people and registering them in the book in Arabet registering pressure and sugar otherthing which I did in patandi hospital I go to children clinic and registering the weight of children and recorded to the book. and take the details of new babys and the parent and registering to the book.

I learn manything at patandi hospital but I will say few of them. I learn how to take care sick people and how to love them.

I learn how to give them treatment while take care of myself and I learn how to be responsibility to the community for any time.

I learn how to save time and how to love all people by not looking the status and how talk in polity language.

I enjoy much the way Nurse moshi and Doctor Emmanuel corporation with us. and the way they loves us and take care for us. and want us to stay longer.

RACHEL ISAACK

COMMUNITY SERVICE REPORT - 2020

My name is RACHEL ISAACK PALLANGYO. I started attending community service at Tengeru in patanchi Hospital. I started on 10/2/2021 until 10/3/2021. The department I was in is SOCIAL WELFARE DEPARTMENT. The work I was doing is to registering incoming people. What I learned is how to stay with different people and all about (GBV) Gender Based violence. All about social welfare is to solve the problems between people and not judgment. Also how to save time since the reporting time was 7:30 and the ending time was 3:30.

I have experiencing many problems from different people since they are complaining about improper caring of children and all about Gender responsibilities. Hence the community service was very well since I was welcomed well by the leader of the department madam RESTITUTA. Since I was mopping offices and Toilets every morning I really enjoyed a lot.

My Name is Athumani Junia I attended the Community Service in Tengera at Palandi Hospital. The service was well Organised were by I learned many things which would help me out my future life.

At first I was working with social welfare where by I dealt with helping mostly the children, elders and Parent conflicts I learned many things about in social life which are happening in our life and some of methods which will help to solve some of problems associate in our community.

On following days I attended the children clinic. Where I was helping the doctor to fill the children file in order to get some treatment. So the service was good where I learned on how to care the children.

Lastly to my side I appreciated the Organization the way they planned about the programs so they should continue with the programs for other student because it helps a lot in our life.

COMMUNITY SERVICE 2021

* REPORT * MATHEW LOGERIA ERASIO

First i would like to say that the service was held at patundi hospital in tengen district where by in tengen the most biggest and known hospital is Patundi hospital.

Patundi hospital is owned by the government where they do both receive people who use insurance cards and even who do not.

On february 2021 i went in patundi hospital where i volunteered working. On the first week of feb i have volunteered working in the social welfare department where they do deal mostly with child gender violence. They do fight and defend children right in the family.

Most of different cases that includes child are solved there in Social welfare department.

To my side i have help working on preparing letters that are given to some people who do need help in solving problems in their family so the letters are given in order to connect two parties or different people who have problems.

Also i have been recording different kinds of cases that should be recorded for example like raping children, beating, discriminating and a lot of cases should be recorded.

Some files also i have recorded some details that involved different kind of cases.

On going weeks i have changed department where i went at the hospital. @ like two weeks I have worked in the hospital in the O.P.D department. where it deals with seeing outsiders patient so i was recording different patients details were i receive different insurance like NITIE jobberbee, Resolution AAR and other record them in patients form and take them to the doctor or specialist when there is needed.

Also i have been even volunteering taking some vaccinations that babies were supposed to be given. The vaccines were taken to the nurse room where babies were supposed to be given.

Experience: I have experienced working on time and how to live with people who do not know each other. This made me stronger and to know that there are different kinds of people who work. So every one should cope and adapt the environment that is new to her.
